IN FRENCH

Learning objectives

- Describe the concept of family resilience using theoretical frameworks
- Describe the clinical implications of this concept, including an example from neonatology
- Understand existing strategies for measuring and evaluating family resilience

Geneviève Laporte, RN, PhD is a postdoctoral fellow at McGill University's Ingram School of Nursing. Her work focuses on stress, coping, and family adaptation in critical care. She was funded by CIHR and FRQ to develop a family resilience scale for neonatal intensive care and is advancing its translation and validation while investigating how coping strategies shape stress and quality-of-life outcomes.
