ENGLISH

Learning objectives

- Examine why person- and system-centred interactions are critical to modern psychosocial oncology care.
- Explore a comprehensive framework designed to capture the complex, lived experiences of people affected by cancer and their supportive environment.
- Translate findings of a mixed-methods research program into actionable insights for oncology research and practice.

Carmen G. Loiselle, PhD, RN, FCAHS holds a Ph.D. degree in Nursing and Psychology (Double Major) from the University of Wisconsin-Madison, USA. She is Full Professor in the McGill's Faculty of Medicine and Health Sciences (Gerald Bronfman Department of Oncology and the Ingram School of Nursing). She holds the Christine and Herschel Victor/Hope & Cope Endowed Chair in Psychosocial Oncology. Professor Loiselle's research focuses on the development, testing, and implementation of innovative interventions (including digital health) to best support individuals affected by cancer.
