ACADEMIC GRAND ROUNDS

Cultural Psychiatry and Related Research in China: From Ethnic Minority Mental Health to AI and Regional Determinants

Jianzhong Yang, MD

Department of Psychiatry, The First Affiliated Hospital, Zhejiang University School of Medicine, Hangzhou, Zhejiang, China

Session chaired by Vincent Laliberté, MD

February 5, 2026

1:30 PM – 3:00 PM (ET)

[Zoom · ID 883 8893 7550 · Code 021037](#)

ONLINE ONLY

NOT RECORDED

Thirty years inside an ethnic minority community and China's emerging AI psychiatry, reveal how culture and geography shape mental health.

Learning objectives

- Summarize the key findings and public health implications from the 30-year longitudinal study on mental health among the Jinuo ethnic group.
- Analyze the potential of artificial intelligence in advancing psychiatric research and clinical practice, with particular attention to its ethical and cultural dimensions.
- Evaluate the influence of historical, geographic, climatic, and cultural factors on regional variations in mental health, using Zhejiang Province as a case study.

Jianzhong Yang, MD is Professor and Chief Physician in Psychiatry at the First Affiliated Hospital of Zhejiang University School of Medicine. He serves as Doctoral Supervisor in the Psychotherapy Training Program, which trains international mental health professionals in Interpersonal Psychotherapy. His research focuses on population trends in anxiety disorders and genetic mechanisms in mood and bipolar disorders.
