PSYCHOSOCIAL RESEARCH ROUNDS

Treating Trauma Behind the Badge: A Real-World Case of MDMA-Assisted Therapy for PTSD

Houman Farzin, MD

Attending physician, Division of Palliative Care, Jewish General Hospital
Clinical Assistant Professor, Department of Family Medicine, McGill University

Session chaired by David Dunkley, PhD

February 19, 2026

1:30 PM – 3:00 PM (ET)

Amphitheatre (ICFP), 4333 Côte-St-Catherine Rd., Montreal QC H3T 1E4

[Zoom · ID 884 8894 7071 · Code 984533](#)

HYBRID

NOT RECORDED

A look inside how Canada's emerging psychedelic-care framework handles trauma when standard treatments fail.

Learning objectives

- Outline the regulatory and procedural requirements for psychedelic-assisted therapy in Canada.
- Analyze the clinical efficacy and non-linear recovery path of MDMA-assisted therapy.
- Evaluate the impact of occupational culture and gender dynamics on trauma treatment.

Houman Farzin, MD is a physician specializing in psychedelic-assisted therapy and whole-person trauma care. Trained in MDMA-, psilocybin-, and ketamine-assisted therapy, he led Québec's first psilocybin training programs, treated Canada's first publicly approved cases, and co-founded digital health initiatives integrating emerging therapeutics with mindfulness and music.
