ENGLISH

Learning objectives

- Review the current literature on the use of AI chatbots in the context of loneliness and discuss why studying public opinion matters
- Explore opinions, perspectives, and experiences expressed on social media regarding the use of AI chatbots to cope with loneliness
- Identify applications of Natural Language Processing in qualitative health research

Ahmed Al-Asmar, MDCM is a psychiatry resident at McGill University with a strong interest in the integration of Natural Language Processing into clinical research, and in the intersection of artificial intelligence and mental health.
