ENGLISH

Learning objectives

- Identify key risk factors for sleep disorders using CLSA data.
- Link blood biomarkers to cognitive dysfunction in OSA and insomnia.
- Describe relationships between biomarkers, sleep, and cognition.
- Assess biomarker use for screening sleep-related cognitive impairment.

Dorrie Rizzo, PhD is a researcher focused on sleep disorders, cognitive dysfunction, and aging. Her work uses large population-based data to examine links between sleep health, blood biomarkers, and cognitive outcomes, contributing to improved screening and understanding of sleep-related cognitive impairment.
