PSYCHOSOCIAL RESEARCH ROUNDS

Challenges in Global Cervical Cancer Prevention: What Influences Women's Participation?

Zeev Rosberger, PhD

Associate Professor of Oncology, Psychiatry, and Psychology, McGill University

Principal Investigator, Preventive Health Behaviours Lab

SESSION CHAIRED BY DAVID DUNKLEY, PHD

DATE AND TIME

January 22, 2026

1:30 PM – 3:00 PM (ET)

Amphitheatre (ICFP), 4333 Côte-St-Catherine Rd., Montreal QC H3T 1E4

[Zoom · ID 884 8894 7071 · Passcode 984533](#)

Hybrid

What stands between effective HPV prevention and women's participation in cervical cancer screening and vaccination worldwide, and why it matters.

Learning objectives

- Explain how Human Papillomavirus (HPV) transmission is the primary cause of cervical cancer.
- Evaluate the critical role of effective HPV vaccination and screening in the global elimination of cervical cancer.
- Identify the factors that facilitate or create barriers to women's engagement in preventive practices.
- Describe how innovative, targeted technological, informational, and psychosocial interventions can improve uptake of vaccination and cervical screening in Canada and Eswatini

Zeev Rosberger, PhD is a psychosocial oncology researcher and Associate Professor at McGill University. His work focuses on the prevention of human papillomavirus (HPV) and HPV-related diseases, with particular attention to psychosocial determinants of screening, testing, and vaccine decision-making among young adults and parents.
